

1 **TITLE: A Method and Apparatus for Reassembling A Toner Cartridge.**

2 **Notice:** This application is a Continuation in Part from patent application 10/439,432.

3 **ABSTRACT:** In the toner cartridge recycling and remanufacturing industry, used
4 xerographic toner cartridges are reconditioned and refilled with toner. The present
5 invention is directed to a method of reassembling of toner cartridges that may not
6 have sufficient securing surfaces to allow the cartridge to be physically held together
7 using an external securing device. The present invention provides for an efficient
8 way of reassembling a toner cartridge once it has been disassembled, by allowing
9 removable reassembly of a toner cartridge. The present invention, used in
10 conjunction with mounting screws, will provide a secure fastening method for
11 reassembling of a toner cartridge. By taking advantage of the present invention's
12 ability to be used repeatedly, the toner cartridge may be refurbished multiple times.
